

CURRICULUM VITAE

With a background in UX/UI Design and a genuine passion for programming, I recently completed a Full Stack Development Traineeship, where I successfully delivered two real-world projects to specification using a range of programming languages and technologies. This experience allowed me to build on my natural inclination for problem-solving, logical thinking and attention to detail, while reaffirming my commitment to pursuing a long-term career in development.

Previously, I designed and launched websites for creative clients using WordPress and worked as a UX/Product Designer at RA Publishing, where I created digital and print content, managed social media, and built an e-commerce website. My early experience as a Stage Manager at The Comedy Store further developed my technical and coordination skills under pressure. I'm now seeking a development role where I can grow, contribute meaningfully, and bring value to a forward-thinking team.

PERSONAL DETAILS

NAME: Liam Vicary
RESIDES: London
TRANSPORT: Full UK driving licence and vehicle
RIGHT TO WORK: Full right to work indefinitely within the UK (British citizen)

CODING TRAINEESHIP

IT Career Switch Ltd
Coding Traineeship – Full Stack Developer
1-year program

During the traineeship, I had to demonstrate a very competent level of the following programming languages and technical skills:

- HTML5, CSS3, JavaScript
- PHP, SQL, MySQL, React, jQuery, C#
- Python, Node.js, Bootstrap, Java, JSON
- Command line Git, GitHub
- Remote API access

ADDITIONAL TECHNOLOGIES:

- Figma, Adobe XD, Visual Studio Code, Affinity Photo, Affinity Designer, Final Cut Pro, Logic Pro X

DEVELOPMENT EXPERIENCE:

Below are the two briefs of development projects I completed with IT Career Switch which can be found in my bio:
<https://www.liamvicary.co.uk/>

Portfolio Project #1: “Gazetteer”

Develop a map-based application in HTML, CSS, JavaScript (jQuery) and Bootstrap presenting geographical and demographic data from JSON returned by PHP modules that query third-party APIs such as GeoNames and OpenWeather.

Portfolio Project #2: “Company Directory”

Full project cycle: Formal proposal followed by the development of a company personnel database application using Bootstrap, JavaScript (jQuery), PHP and MySQL. Sign off obtained after demonstrating that all of the required functionality was present and working as intended through the preparation of a formal test script.

CAREER HISTORY:
